SUMMARY

Specialist in Multicloud Architecture and Software Engineering, focused on transforming legacy infrastructures into modern microservices ecosystems and designing robust environments for all types of demands and scalability. Cloud Solutions Architect at CCM Tecnologia, leading strategic migration and optimization projects in multicloud environments.

PROFESSIONAL EXPERIENCE

Cloud Solutions Architect CCM Soluções em Tecnologia LTDA	Mar 2025 - Present
- Architecture and implementation of multicloud environments, including migrations, deployments, and workload resizing. - Development of automation, monitoring, and management tools for cloud environments using Python and JavaScript, reducing manual activities and increasing operational efficiency. - Implementation of Infrastructure as Code (Terraform, Ansible, Jenkins, and Kubernetes) for standardization and scalability of environments. - Optimization of costs and resources in cloud environments, aligning performance and financial efficiency. - Definition of best practices for architecture, security, and high availability to ensure reliability and governance of environments.	
Cloud Infrastructure Analyst Statum Tecnologia em Informática LTDA	Aug 2024 - Mar 2025
- Support, configuration, and provisioning of cloud environments. - Server monitoring and incident response. - Management of application deployment and migration routines.	
Cloud Support Analyst Senior Sistemas S/A	Aug 2021 - Jul 2024
- Diagnosis and resolution of infrastructure problems. - Preventive maintenance and incident remediation. - Implementation of automation and continuous optimization.	
Analista de Suporte e Operações de TI Pedra Agroindustrial S/A	Jan 2021 - Aug 2021
- Administration and configuration of mobile devices and workstations. - Management and maintenance of the PABX network. - Implementation and monitoring of backup routines.	
Analista de Infraestrutura Junior SMARAPD Informática LTDA	Feb 2018 - Jan 2021
- Specific adjustments and optimizations to the database. - Configuration and validation of prerequisites, updating and installation of Senior systems. - Execution of automated tests on servers and applications.	

KNOWLEDGE

Programming Language: Python, JavaScript, TypeScript, Java, Bash, PowerShell.
Database: Oracle Database, Autonomous Database (OCI), PostgreSQL, SQL Server, MySQL, MongoDB.
DevOps and Monitoring: Terraform, Ansible, Docker, Kubernetes, Jenkins, Zabbix, Grafana.
Cloud Plataforms: Oracle Cloud Infrastructure (OCI), Microsoft Azure, AWS, Google Cloud, Huawei Cloud.
Middleware, Integration and Messaging: Apache Kafka, RabbitMQ, Apache Tomcat, WildFly, GlassFish.

CERTIFICATIONS

OCI Migration Architect Professional Issued 09/2025	OCI Architect Associate Issued 08/2025	Microsoft Azure AZ-900 Issued 05/2024	ITIL 4 Foundations Issued 06/2022
